

# ORANGE COAST COLLEGE

---

Academic Senate Meeting |

Faculty who are grading student work at the end of the semester are unable to use the *AI Checker* for the remainder of their grading which necessitates that they recheck all of their student essays without documenting AI content. (Sociology Professor Candy Pettu [REDACTED]) Learning Staff stated that *Turnitin* has poor communication and notifications, and that the December 31 turnoff was not predictable. English Department Chair Andy Stuart stated that after the discovery of the AI turnoff, that he found the free preview time period information by Googling.

- According to an email exchange between Curtis Williams and *Turnitin*'s Leann McArthur, Senior Customer Success Manager and Adam Conner, Sr. Strategic Accounts Manager:
  - "*Echoing everyth*

[REDACTED]

Moving forward, management must honor the faculty purview of 10 + 1 as it relates to instructional technology.

No single person may make unilateral decisions related to the funding and access to instructional technology. This includes: LMS, assessment, research resources, syllabi, online testing, and other software related to Instruction that is not listed specifically in this Report.

Faculty positions, through the Academic Senate, regarding instructional technology must be the

1. \_\_\_\_\_ ) This is a two-year program within the school of Allied Health, and it prepares students to take a national credentialing exam to become a Nutrition and Dietetics Technician. People can use this and immediately go out and work or they can use it as a career ladder to become a registered dietitian.
2. \_\_\_\_\_ : This is a transfer degree in Nutrition and Dietetics. Most students who choose this pathway are on their way to becoming a registered dietitian, which now requires a master's degree.
3. \_\_\_\_\_ This is a one-year program that prepares graduates to run food and nutrition services in a healthcare facility.
4. \_\_\_\_\_ This is a certificate or AS degree.
5. \_\_\_\_\_ : This is a certificate.

Dietitians have three agencies that they work with for accreditation and credentialing.

1. \_\_\_\_\_ : The main professional organization in the U.S. is called ACEND, *Accreditation Council in Education for Nutrition and Dietetics*. They accredit our Allied Health program. That is the national credentialing exam where graduates, once they successfully complete, can take the

are going to use those." They put up signage. They brought in 150 yards of succulent soil, and a lot of boulders, including 80 tons of a rock called Baja Crest Red.

In the Tree Care class, they go out and plant trees on campus. From seed, they grew thirteen Queens of the Bottle Trees in 2007 [see right]. These usually grow in Australia. He tried to see if they could transplant some of these across campus. The company that did this wanted \$4,000 per piece. He went to the company and said, "How about we trade? You move one, you get one." They said yes. They harvested five of them. They planted five of them. The other five went to Brad Pitt's house.

They had gotten some seed from online, and they planted larger eucalyptus trees called Rainbow Gum. Rick Harlow, who teaches the horticulture class for trees, said we want to get some small Swamp Gums. They grow really fast.

We are just trying to beautify the campus.

We grew a Montezuma Cypress from seed. It comes from Oaxaca, Mexico. It is the largest gird tree in the world.

In 2019 we got a Brazilian Plumed Fern Tree. This tree can grow ten feet a year.

A student in our plant propagation class lives by the tree outside of the Holy Family Cathedral church in the City of Orange. He said he got some seed from that tree. We germinated that. It is very hard because a lot of these trees need a specialized wasp that pollinates those trees. This original tree was planted in 1875 [see left]. In one hundred years, we will have a great tree.

Our choices for trees are unusual. We all have *our* trees on campus. We are trying to get biodiversity. Trees are generational. Planting trees is a commitment.

Due to time limitations, the Spring Plenary Report, BPAP Report, and Academic Standards Committee Report could not be presented. They will be on the agenda next week
